Do you have experience with installing GraniteCrete?	If so, approximately how many square feet?	

To become a certified installer, your company will be required to complete twenty five thousand square feet of GraniteCrete installations, with all installations passing our final quality inspections. You will retain this designation as long as your company completes at least 2,500 square feet of installations annually and all installation meet GraniteCrete installation standards. Your company will be committed to insuring that customers receive installations that meet the GraniteCrete standards every time.
